

SRA Wind Power Systems WG 2

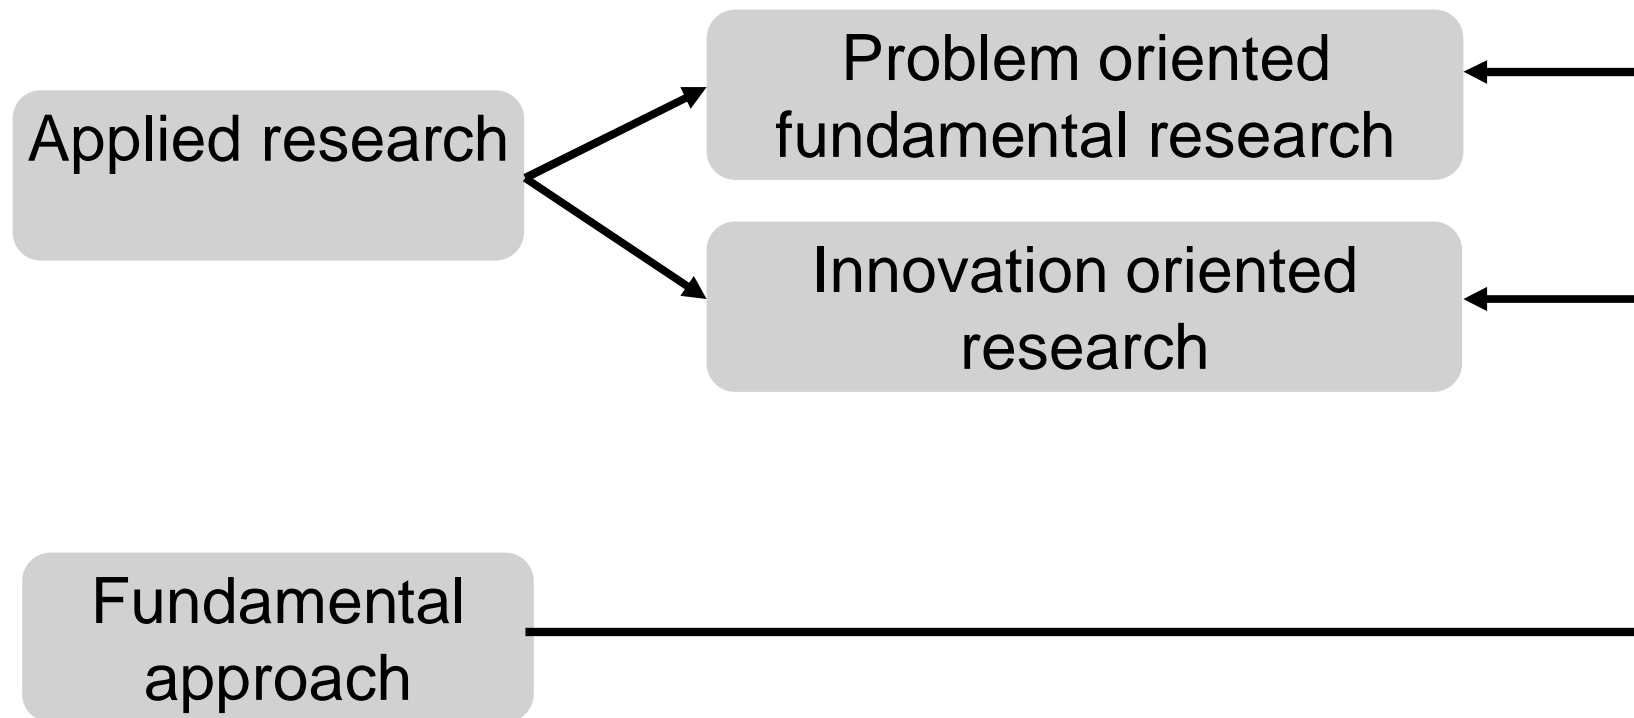

Jos Beurskens
Chairman WG 2

Brussels, 11 Feb. 2008

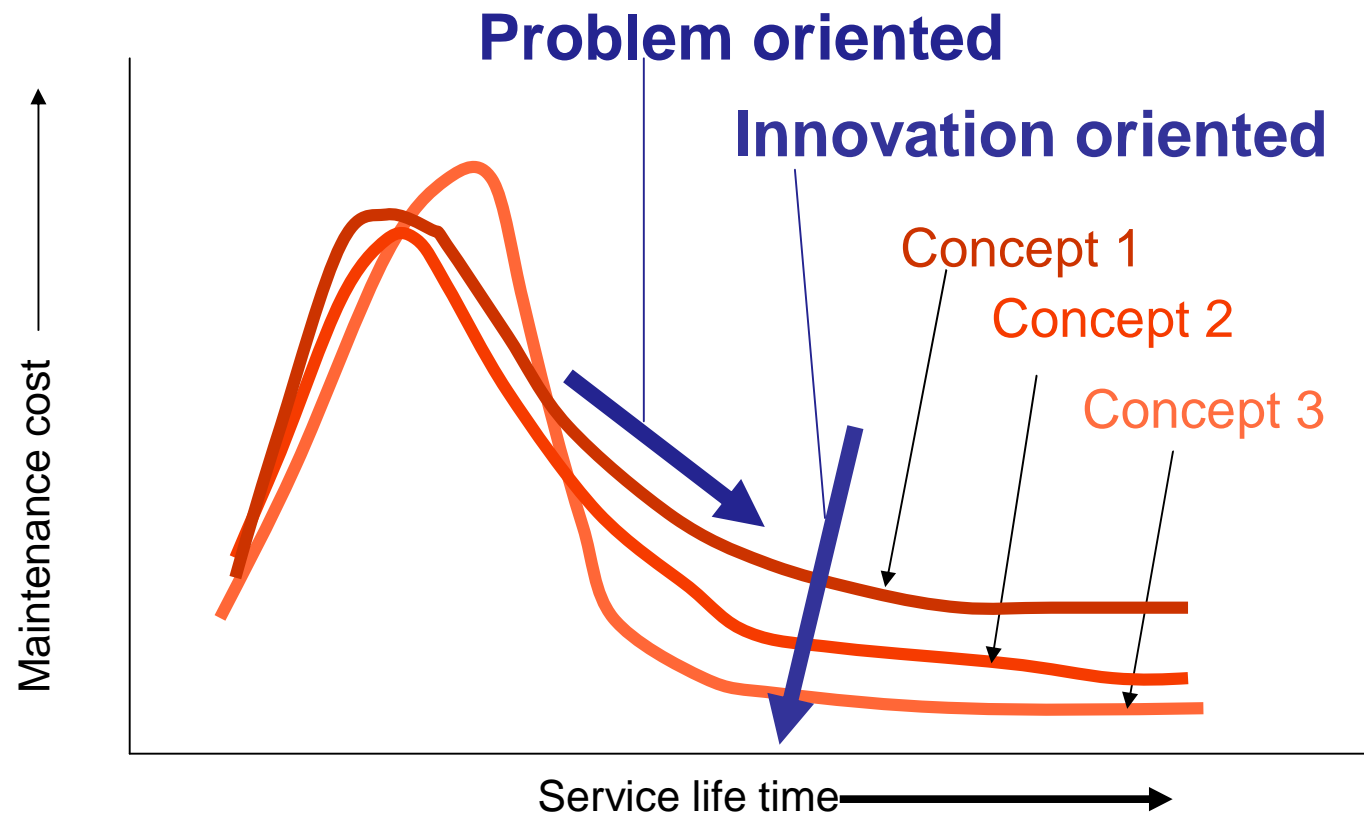

System boundaries WG 2

R&D

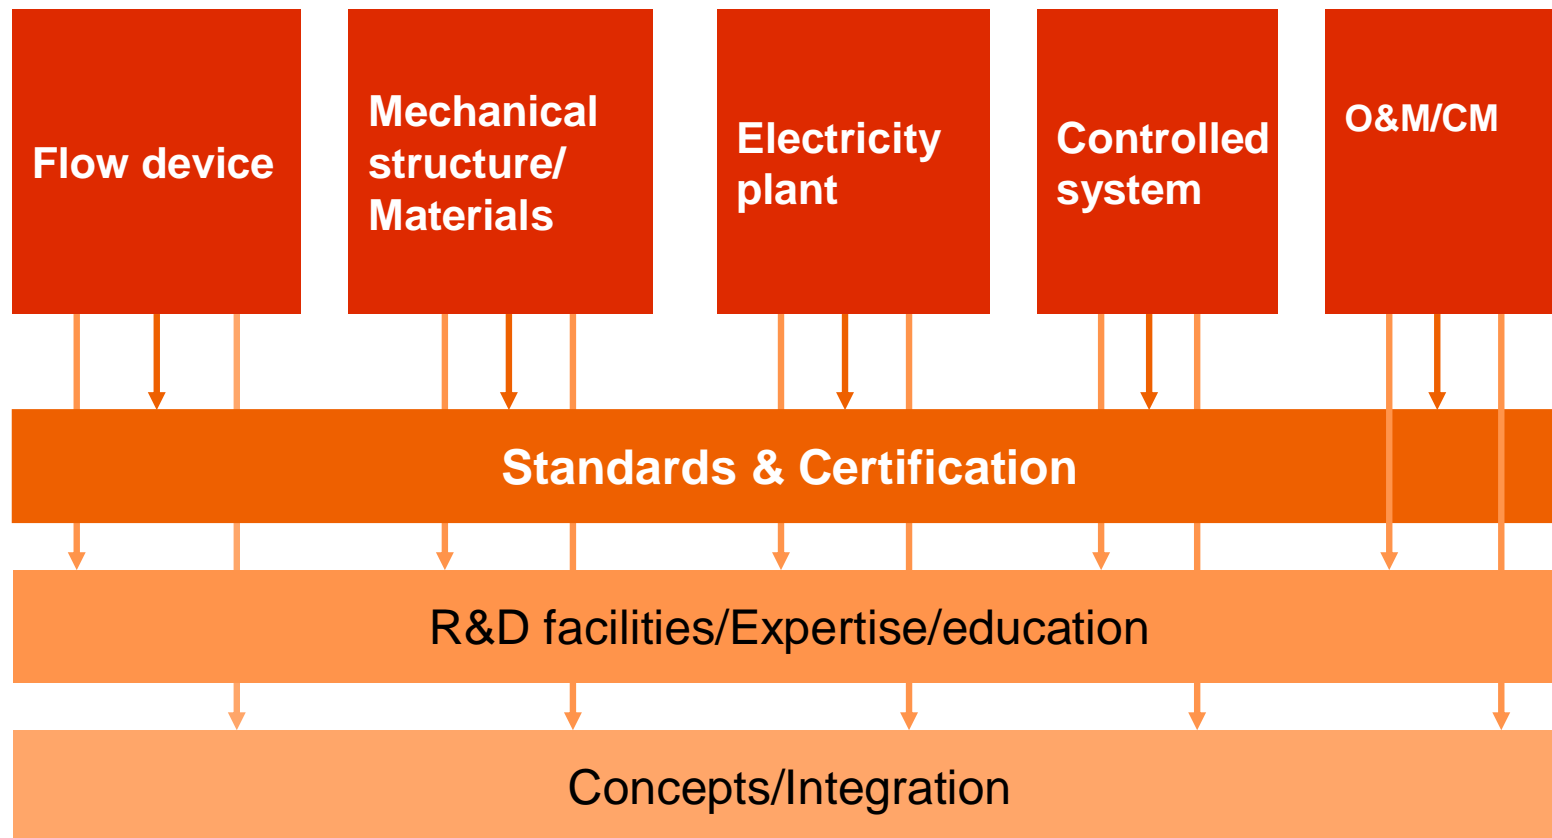

R&D strategies

Structuring R&D into priority areas

Consider a wind turbine system as a:

Identifying R&D issues

- No ranking, only essential issues.
- How do we identify essentials? (weighing of potential impact on cost, reliability, .. or intuitive.)
- Global ranking of priority areas

Agenda issues WG 2

- Quantify objectives ?
- R&D classification (innovation, problem oriented(incremental research) in relation with risk > who is financing what?)
Is this an issue for WG 2 only or for TPWind?
- R&D instruments (adopt to EC jargon?)
- Check if all comments are properly included
- Missing elements (check list)
- R&D infrastructure, resulting from R&D issues

Interactions with other WG's
